DETAILED ACTION

This application is a continuation of the application serial number 10/251,693, filed on September 17, 2002, now U.S. Patent No. 6,609,836.

Drawings

1. The drawings, filed on 08/19/2003, are accepted.

Specification

2. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.

Inventorship

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102((e), f) or (g) prior art under 35 U.S.C. 103(a).

Obvious Type Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 10 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 and 13-16 of U.S. Patent No. 6,609,836.

Although claim 10 of the present invention and claims 1-6 and 13-16 of the copending application are not identical, they are not patentably distinct from each other because they essentially recite the same method for connecting a first fiber optic

element to a second fiber optic element of an optical fiber coupler. The claims are therefore **not** patentably distinct.

Allowable Subject Matter

6. Claims 1-9 are allowed.

The prior art fails to disclose or reasonably suggest an optical fiber coupler for connecting a first fiber optic element to a second fiber optic element comprising a first fiber optic element in a first direction whereby to position a free end of the first fiber optic element in a selected zone; a second fiber optic element extending into the selected zone from a direction generally opposite to the first direction and a cured optical grade epoxy resin body comprising the selected zone and enveloping the free ends of the fiber optic elements; whereby to provide physical and optical connection between the first and second fiber optic elements as recited in claim 1.

Claims 2-9 are dependent on the allowable claim 1; therefore, claims 2-9 are also allowed.
